DETAILED ACTION

Allowable Subject Matter

1. Claims 4, 9, 25-33, and 36-38 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art does not teach or fairly suggest executing processing from a starting address space identified by said table of said hardware classifier if said hardware classifier is enabled and executing processing of said frame beginning at a process execution level determined from a port configuration entry of the interface of the port said frame was received if a configuration bit of said egress processor indicates said hardware classifier has been disabled, as specified in independent claims 4, 25, 27, 29, 33, 36, and 38.

The prior art does not teach or fairly suggest a hardware frame classifier includes an address table which decodes frame header extension values and variable frame extension values which point to said egress processor starting address location, as specified in independent claim 9.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
